

HARIPRASATH

MERN STACK DEVELOPER (REACT.JS | NODE.JS | MONGODB | MYSQL)

Contact

+91 9080247060
hariprasath2422@gmail.com
HariprasathM
Chennai,TN

Technical skills

Frontend Development: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap

State Management: Redux, Context API, Zustand

API & Data Handling: Axios, React Query

Backend Development: Node.js, Express.js, REST API Development, JWT Authentication

Databases: MongoDB, MySQL (Schema Design, Query Optimization, Indexing)

Tools & DevOps: Git, GitHub, GitLab, Docker (Basic), GitHub Actions, Postman

Testing: Jest, React Testing Library

UI & Collaboration: Figma, JIRA, Agile/Scrum

Other Skills: Problem Solving, Debugging, Clean Code Practices

Professional Summary

Full Stack Developer with 3+ years of experience building scalable web applications using React.js, Node.js, Express.js, MongoDB, and MySQL. Skilled in frontend and backend development, designing RESTful APIs, and creating responsive user interfaces. Strong in JavaScript (ES6+), TypeScript, and database design, with a focus on performance, clean code, and reliable application development.

Work Experience

Software Engineer | Digylax Private Limited 2025-2026

Supplier Hub Management

- Engineered a full-stack Supplier Hub platform enabling end-to-end vendor lifecycle management and procurement operations
- Implemented secure authentication and role-based access control (RBAC) for Admin and Vendor dashboards
- Automated vendor onboarding by integrating Surepass API for document verification
- Built an OCR-based invoice processing system using AWS, reducing manual data entry
- Developed an interactive PDF viewer with text highlighting for invoice validation and review
- Designed and implemented scalable REST APIs using Node.js and MongoDB for vendor, procurement, and RFQ workflows
- Delivered modular features across procurement, logistics, finance, payments, and support operations

Software Engineer | Tringapps Research Labs 2021-2024

SQL Capital Management, SQL

Education

Bachelor of Computer Science
and Engineering (CSE)

PSNA College of Engineering
And Technology

Aug 2017 - Aug 2021

7.8/10 CGPA

Certifications

Docker for the Absolute Beginner-
Hands On-DevOps - KodeKloud
Training - Udemy

Completed: Mar 2025

Covered: Docker architecture and
components, creating and managing
containers, working with Docker
images, Dockerfile best practices,
Docker Compose, container
networking, volumes, and hands-on
DevOps integration scenarios.

The Complete MongoDB Course -
Udemy

Completed: Mar 2025

Covered: Core MongoDB concepts
and architecture, CRUD operations,
aggregation framework, query and
projection operators, indexing for
performance optimization,
data modeling (embedding vs
referencing), and integrating
MongoDB with applications using
Python drivers.

- Developed features for tax document uploads, investor share calculations, and secure document management using Amazon S3
- Implemented robust form validation using React Hook Form and Yup, improving data accuracy
- Built CSV bulk upload functionality for investor onboarding with controlled S3 access
- Integrated AWS Cognito for authentication, user pool management, and role-based access control (RBAC)
- Worked with GraphQL and Apollo Client for efficient data fetching, caching, and state management
- Managed global state using React Context API, reducing prop drilling and improving scalability
- Designed and developed scalable REST APIs using Node.js and Express.js for investor and document workflows
- Ensured seamless integration between GraphQL services, Node.js backend, and React frontend.

Soltage - Data Portal Website

- Developed User Management and Project Management modules with both tabular and graphical interfaces
- Built interactive data visualizations using React ApexCharts (bar, donut, and mixed charts)
- Improved UI performance, responsiveness, and layout consistency, enhancing overall user experience
- Managed application state using Redux Toolkit for scalable and maintainable state handling
- Integrated and consumed REST APIs for data fetching, updates, and synchronization
- Contributed to backend enhancements using Node.js and Express.js, including validations and API improvements

Tringhub - Project Management Tool

- Built an internal dashboard for employee and project management using React.js
- Developed reusable UI components and implemented core features based on design requirements
- Implemented form validation using React Hook Form and Yup, improving data accuracy and reducing input errors
- Created data visualizations using React ApexCharts (e.g., column charts)
- Integrated and consumed REST APIs for employee and project data workflows

Additional Competencies

- Analytical and Problem Solving Skills.
- Attention to Detail and Accuracy.
- Collaboration and Teamwork.
- Communication and Presentation Skills.
- Critical Thinking and Decision Making.
- Data Visualization.

- Contributed to backend development using Node.js, Express.js, and MySQL, including CRUD operations and API enhancements
- Performed manual testing to validate feature stability and end-to-end user workflows

REVOLT, Rap-Up - Events management site

- Streamlined content management workflows by customizing Adobe Experience Manager (AEM) using JavaScript and CSS automation
- Developed custom AEM components and scripts to reduce manual content updates and improve delivery efficiency across web and mobile
- Integrated RESTful APIs to distribute multimedia content (videos, articles, interviews) across web, mobile, and smart TV platforms
- Collaborated with content and backend teams to optimize data flow and media rendering, improving load times and content delivery performance
- Maintained high code quality and documentation standards to support scalability and future integrations

Thomson Reuters GraphQL — API customization for the News Website

- Designed and customized GraphQL query APIs based on client requirements for dynamic content delivery
- Integrated and transformed REST API data to support GraphQL schema and resolver logic
- Implemented unit testing using Jest with mocked data to ensure reliability and accuracy
- Worked with GraphQL subgraphs to improve modularity and enhance service architecture
